

The Keck Institute for Space Studies
and The Planetary Society
present a free public panel ~

The Future of Human Spaceflight

Tuesday, April 8, 2014

8:00 - 9:30 pm

Beckman Auditorium
California Institute of Technology

Tom Jones

*Scientist, Author, Pilot
and Space Shuttle Astronaut*

Garrett Reisman

*DragonRider Program Manager, SpaceX
and Space Shuttle Astronaut*

Rusty Schweickart

*Chairman Emeritus, B612 Foundation
and Apollo Astronaut*

Moderator: Lou Friedman

Executive Director Emeritus, The Planetary Society

In the 42 years since the last Apollo mission, humans have not flown beyond low Earth orbit. The capability to go back to or even beyond the Moon does not yet exist. President Obama adopted the flexible path proposed by the 2009 (Augustine) Committee to Review U.S. Human Spaceflight Plans by proposing NASA plan a series of steps into the Solar System – reaching a near-Earth asteroid by 2025, the vicinity of Mars in the 2030s and landing on Mars in the early 2040s.

Join a panel of three astronauts as they discuss the future of human spaceflight.

No registration is required for this free public panel discussion. Seating is limited and is available on a first come, first served basis.
