

International Roles

April 8, 10 am – 10:30 am

Session moderators: Marco Tantardini, Natan Eismont

1. If the Asteroid Initiative is assembled as an int'l program, what the differences wrt ISS?
2. What do we need asap from int'l partners? (*eg. follow-up observations, ...*)
3. What experiments connected to ARM int'l partners can do on ISS?
4. What parts of the ARV are opportunities for the int'l partners especially? (*eg. from BAA: capture systems, rendezvous sensors, partnership opportunities for secondary payload, ...*)
5. What parts of the ARCM are opportunities for the int'l partners especially? (*eg. from BAA: partnership opportunities for ARCM, ...*)
6. What (else) can int'l partners offer? (*eg. Europe as ESA / national space agencies, Russia, Canada, Japan, ...*)
7. [Will non-NASA astronauts participate to the manned missions to the asteroid? When?]
8. What actions can the KISS team do to facilitate int'l cooperation?
9. How does ARM fit in GER? (or how can we make it fit?)
